## SUMMARY

Creative and detail-oriented Frontend Developer with 3+ years of experience crafting pixel-perfect, responsive, and accessible interfaces using React, Next.js, and modern styling tools like Tailwind CSS. Passionate about building user-centric digital products with reusable UI components, smooth UX flows, and performance-first design. Skilled in collaborating with backend teams and converting complex business logic into engaging visual interfaces.

## WORK EXPERIENCE

### Front-end Developer

IdeaMind Technologies, Hyderabad

Jun '24 — Present

- Designed and implemented performant UI components across 4 major products, enhancing page load speed and user retention with animations and using best UX practices.
- Integrated dynamic dashboards and visual workflows, improving user engagement by 40%.
- Collaborated with UX designers to convert Figma prototypes into responsive, production-ready designs using Tailwind and React.
- Designed and developed the company's own design system, which led to similar product designs that were very beneficial, helped to establish an identity, and reduced the production of similar components by 70%.
- 4 products were successfully created from scratch in a time-sensitive setting with quality and speed, resulting in 40% more development than usual.

### Front-end Developer

Swami Ramanand Teerth Marathwada University, Nanded, Maharashtra

Apr '22 — Jun '24

- Led the development of intuitive web interfaces for the University Management System used by faculty, admin, student and 10+ more roles.
- Streamlined workflows for reports like NIRF, CAS and 10+ more by building reusable UI forms with real-time validations reducing the manual and paper efforts by 95%
- Reduced user confusion and training needs by 50% via self-guided UI flows and interactive tooltips.
- Designed efficient PDF and Excel reports generation UI for, which was 70% more readable than traditional reports.
- Actively participated in brain-storming sessions. Pro-actively submitted new Ideas and suggestions and gathered valuable feedbacks time to time.
